

June 11, 2024 (Day 2):

Diving Deeper into HTML Forms

Topics Covered:

- Working with form elements (`<input>`, `<textarea>`, `<select>`, `<button>`)
- Handling different input types (text, email, password, checkbox, radio).
- Basic form validation (required, pattern, min/max length).
- The importance of the `action` and `method` attributes in forms.

- Project Work:

Added a contact form to the portfolio site. Implemented input fields for name, email, message, and a submit button.
