

## June 17, 2024 (Day 8):

Arrays, Objects, and DOM Manipulation\*\*

- Topics Covered:

- Working with arrays: `.push()`, `.pop()`, `.shift()`, `.unshift()`, `.map()`, `.filter()`.
- Creating and manipulating objects.
- DOM manipulation: Selecting elements, modifying text content, styles, and adding/removing classes.

- Project Work:

Built an interactive list on the portfolio page where users can add and remove items (e.g., a list of skills or hobbies). Items are stored in an array and updated dynamically.
