

June 13, 2024 (Day 4):

CSS Layout Techniques

-Topics Covered:

- The Box Model (content, padding, border, margin).
- Flexbox for simple layouts (flex-direction, justify-content, align-items).
- Introduction to CSS Grid for more complex layouts.

- Project Work:

Used Flexbox to create a two-column layout on the portfolio homepage (one column for text, the other for images or icons). Adjusted margins and padding for better spacing.
