

June 21, 2024 (Day 12):

React Lists and Conditional Rendering**

- **Topics Covered:**

- Rendering lists dynamically using `.map()` in React.
- Conditional rendering based on state (using ternary operators).
- Showing or hiding elements based on user interaction.

- **Project Work:**

Implemented a "skills" section in the React portfolio where users can toggle between different skill categories (e.g., Frontend, Backend, Design) using conditional rendering.
