

June 18, 2024 (Day 9):

Advanced JavaScript Concepts**

- **Topics Covered:**

- ES6 features: arrow functions, template literals, destructuring, and spread operator.
- Understanding `localStorage` and `sessionStorage` for storing data.
- Basic debugging techniques with `console.log()`.

- **Project Work:**

Added a "theme toggle" feature to the portfolio, allowing the user to switch between light and dark modes. This feature persists the user's choice using `localStorage`.
