

## **June 15, 2024 (Day 6):**

Introduction to JavaScript-

Topics Covered:

- Basic JavaScript syntax: variables (let, const), data types (string, number, boolean, array, object).
- Operators (arithmetic, comparison, logical).
- Basic control structures (if/else, switch).
- Simple loops (for, while).

- Project Work:

Created a simple JavaScript-based interactive feature on the portfolio site, such as a greeting message that changes based on the time of day.
