June 20, 2024 (Day 11):

React State and Events

- **Topics Covered:**

  - Using `useState` hook to manage component state.

  - Handling user events in React (click, input, form submission).

  - Understanding controlled components and forms in React.

- **Project Work:**

 Added functionality to the React portfolio site to collect and display user input through a form (e.g., submitting a message or feedback).
